INSTALLATION INSTRUCTIONS

⚠ Electrical products can cause death, injury, or damage to property. Installation of this product must be carried out by a qualified electrician.

- Measure the distance between the gyra tools and make the appropriate holes on your ceiling (1).
- Screw the gyra tools to your ceiling (2).
- Connect the power supply to the terminal block inside the profile (3). You can use the recommended hole of the profile to pass the cable, or open a new one.
- Apply the profile to the gyra tools when they are 30° turned (4).
- Push the protrusion of the gyra tool while pressing the profile on the ceiling direction to lock it (5).
- Reconnect power.

WARNING

- Make sure that the products is installed properly before connecting to electricity.
- Do not cover the fitting.
- Not for outdoor use or in wet conditions.

Connecting the Terminal Block

Connect main supply (brown - Live, blue - Neutral) into terminal block making sure all connections are tight.
